

Centre of Excellence: Wired and Wireless Technologies

5G QUALITY OF SERVICE

RAN SCHEDULING & NETWORK SLICING

21, 28 February & 7
March 2026

10:00 to 13:00

Hybrid (Online &
Onsite)

A 3-day intensive technical program focused on building strong foundations and practical insights in 5G QoS Architecture, RAN Scheduling, and Network Slicing.

The program will cover:

- *Internet application traffic and QoS fundamentals*
- *5G QoS architecture and protocol stack*
- *Physical layer transmission and resource allocation*
- *RAN scheduling concepts and algorithms*
- *Advanced scheduling techniques and slice admission control*
- *5G network slicing and multi-cell scheduling*
- *Use cases, practical implementations and future directions*

Prerequisites: Participants should have prior basic knowledge of wireless communications, IP networking, LTE/5G architecture and mathematical concepts used in communications. The program is not intended for beginners or freshers.

The program will feature in-depth technical lectures & discussions delivered by:

Prof. Anurag Kumar, INSA Distinguished Professor, Dept. of Electrical Communication Engineering, Indian Institute of Science (IISc), Bengaluru.

Registration Fee

Students (UG / PG / PhD): ₹1,500/- (incl. GST)

Working Professionals: ₹2,500/- (incl. GST)

First-Come First-Served basis, with Limited seats only
